

Challenge #5: Implementation of head tags

Implementation of head tags

The image displays two screenshots of a code editor, likely Visual Studio Code, showing the implementation of head tags and CSS for a website header.

The top screenshot shows the `index.html` file. The code includes the `<DOCTYPE html>` declaration, the `<html>` root element, and the `<head>` section. Inside the `<head>` section, there are several meta tags and link tags:

```
<!DOCTYPE html>
<html>
  <head>
    <meta charset="utf-8">
    <meta name="viewport" content="width=device-width, initial-scale=1">
    <title>PallerSite</title>
    <link rel="icon" type="image/x-icon" href="pr7.JPG">
    <link rel="stylesheet" type="text/css" href="style.css">
    <link rel="stylesheet" href="https://unpkg.com/boxicons@latest/css/boxicons.min.css">
    <link rel="preconnect" href="https://fonts.googleapis.com">
    <link rel="preconnect" href="https://fonts.gstatic.com" crossorigin>
    <link href="https://fonts.googleapis.com/css2?family=Poppins:ital,wght@0,300;0,400;0,500;0,600;0,700;1,900&display=swap" rel="stylesheet">
  </head>
  <body>
    <!--header design-->
    <header>
      <a href="pr7.JPG" class="logo">Cos<span>Mic</span></a>
      <ul class="navlist">
        <li><a href="#home" class="active">Home</a></li>
        <li><a href="#about">About Us</a></li>
        <li><a href="#services">Services</a></li>
        <li><a href="#portfolio">Products</a></li>
        <li><a href="#contact">Contact Us</a></li>
      </ul>
    </body>
</html>
```

The bottom screenshot shows the `style.css` file. The code defines the `header` and `navlist` styles:

```
header{
  position: fixed;
  width: 100%;
  top: 0;
  right: 0;
  z-index: 1000;
  display: flex;
  align-items: center;
  justify-content: space-between;
  background: transparent;
  padding: 22px 15%;
  border-bottom: 1px solid transparent;
  transition: all .5s ease;
}

.logo{
  color: var(--text-color);
  font-size: 40px;
  font-weight: 500;
  letter-spacing: 1px;
}

span{
  color: var(--main-color);
}

navlist{
  display: flex;
  gap: 10px;
  list-style-type: none;
  padding: 0;
  margin: 0;
}
```
